Paul Ratzmann is a partner at the firm. Paul is a registered patent attorney and practices various aspects of intellectual property matters including domestic and foreign patent prosecution, due diligence, opinions, and design-around. He has an extensive background in the mechanical and electro-mechanical arts.

Paul is a member of the Fishman Stewart Medical Device and Life Science practice group. He has drafted and prosecuted numerous patent applications that include the fields of computed tomography, magnetic resonance, x-ray systems, x-ray tubes, and PET, including hardware and imaging algorithms. Paul has also worked in a wide range of technologies, including solar thermal and photovoltaics, hybrid vehicles, automotive, electrical motors and actuators, semiconductor fabrication, micro-electronics packaging, vehicle transmissions, and motor control systems.

Prior to his legal career, Paul worked for several years in product development of various medical devices for a large medical equipment provider. Paul also worked at Fermi National Accelerator Laboratory and conducted basic engineering research in such diverse fields as heat transfer, materials development, and epoxy formulation. He also conducted basic research as an undergraduate in cryogenic engineering. He has 11 patents issued as a named inventor and has authored several journal articles in various engineering and physics publications.

Paul is a veteran and served as Military Police in the US Army in Panama and Honduras. In his free time, he is an avid reader and enjoys gardening.
